

SOCIAL STUDIES COMPILED SRQ2(b). NOTES

Take note that this is the only question in Social Studies that you can study for. These are just sample frameworks to follow but you have to adapt to the issue stated in the question by changing your **explanation**. The **explanation** emphasises the significance of your **point**.

Chapter 2.3 – Ideas Shaping Governance

Ideas Shaping Governance

- Having good leadership
- Anticipating changes and staying relevant
- Providing a stake for everyone
- Practising meritocracy

2.3.1 – Having Good Leadership

POINT A person who demonstrates leadership capabilities and is honest, capable, of good morale and incorruptible.

EXAMPLE Mr. Peter Ong, head of civil services, promised to build closer relationships among Singaporeans and public officers, building a better home.

EXPLAIN Good leaders are less corrupted so this will result in them gaining the trust and confidence of the people. People would feel that their leaders are rightful ones and would ensure the country's development.

2.3.2 – Anticipating Changes and Staying Relevant

POINT Realises problems which may arise in the future and identifies potential solutions to meet and solve problems. The government makes decisions that will benefit the people of Singapore in the future.

EXAMPLE In 2005, the government decided to build two integrated resorts (IRs) at Marina Bay and Singapore. The government anticipated change and stayed relevant especially in seeking economic benefits.

EXPLAIN Allows Singapore to be prepared and better at debating the change so Singapore faces fewer impacts when the problem arises.

2.3.3 – Providing a Stake for Everyone

POINT Gives citizens the rights to make decisions and something to own.

EXAMPLE Mr. Lee Kuan Yew promised to provide everyone with affordable housing under the Housing Development Board (HDB) scheme. Enables Singaporeans to own their homes through the provision of housing grants.

EXPLAIN Make people feel their opinion matters and they develop a stronger sense of belonging. Active participation results in an increase in an effort to contribute to society. The government will be sure of the public wants and they can make better decisions.

2.3.4 – Practising Meritocracy

- POINT** People get rewarded by how much effort they put in.
- EXAMPLE** Students who perform well in their studies and CCAs are rewarded in ways to help them excel further in their education. Awards such as the Edusave Scholarship and Merit Bursary schemes reward the students based on the hard work students have put in.
- EXPLAIN** Everyone is equal and has a chance to succeed. People are not judged based on their race, religion or socio-economic background but by the amount of hard work they put in. The effort to improve society increases.

Chapter 3.1 – Role of the Government in working for the Good of Society

Roles of the Government

- Maintaining internal order and external security
- Ensuring justice
- Providing goods and services for the public
- Safeguarding the interests of citizens

3.1.1 – Maintaining Internal Order and External Security

- POINT** Protect the citizens, property and whatever society believes should be protected. The government maintains internal order and external security.
- EXAMPLE** **Internal Order:** SCDF, SPF, ICA, CNB; **External Security:** SAF
- EXPLAIN** Singapore's defence is strengthened and potential enemies are deterred from attacking Singapore.

3.1.2 – Ensuring Justice

- POINT** The Judiciary interprets and applies laws passed by the legislature.
- EXAMPLE** Family Justice Court providing Personal Protection Order (PPO) if one faces family violence. The abuser is obstructed from entering one's house.
- EXPLAIN** People feel confident that they will be judged fairly.

3.1.3 – Providing Goods and Services

- POINT** Providing resources to improve the well-being of citizens. Goods and services are provided or subsidised by the government to ensure all citizens have access to them.
- EXAMPLE** Public transportation in Singapore, such as Mass Rapid Transit (MRT) system. Comprises a dense transport network consisting of six major lines (as of 2019).
- EXPLAIN** Citizens can enjoy the different goods and services which improves their well-being. Allows more connections and better services.

3.1.4 – Safeguarding the Interests of Citizens

- POINT** Ensuring there is no abuse by employers and having a sense of security at old age.
- EXAMPLE** Central Provident Fund (CPF) scheme helps Singaporeans prepare for retirement. It enables them to finance their housing and healthcare needs and have a source of lifelong income in retirement.
- EXPLAIN** Citizens would have a sense of security living in the country.

Chapter 3.2 – Role of Citizens in working for the Good of Society

Roles of Citizens

- Individuals
- Informal Organised Groups
- Formal Organised Groups

3.2.1 – Role of Individuals

- POINT** A single person working for a particular cause spending own time and resources. They do so usually because they feel that their actions will be helpful and they feel strongly for the cause which they contribute towards.
- EXAMPLE** “A Litter at a Time” programme was started by Ms. Elisa Ng in 2013 to encourage citizens to go an extra mile and pick up a piece of litter a day.
- EXPLAIN** It addresses a specific issue the person has identified. The actions of individuals can benefit many people directly and inspire others to make such improvements as well.

3.2.2 – Role of Informal Organised Groups

- POINT** Informal groups are organisations with a specific, short term objective related to issues that arise suddenly. These groups are temporarily formed and may not be registered.
- EXAMPLE** During the 2013 haze in Singapore, an informal group comprising a leader Mr. Jeremy Chua, gave out masks to residents to help them weather the haze.
- EXPLAIN** Fills any gap the government had missed. This implies that they complement government efforts.

3.2.3 – Role of Formal Organised Groups

- POINT** Government registered, organised and recognised. These groups have clear objectives and are formally registered with the government. They address a wide range of interests such as persons with special needs and protecting the environment.
- EXAMPLE** Roles of Non-Governmental Organisations (NGOs) and Voluntary Welfare Organisations (VWOs).
- EXPLAIN** Complement the role of government.

Outcomes of Public Participation

Contributing to the needs of society	Improve and sustain the general wellbeing of society.
Influencing government decisions	Influencing the decisions made and plans for Singapore.

Individual vs organised groups

	Individuals	Organised groups
Contributing to the needs of society	Immediate impact, benefits people directly, inspires others.	Sustainable impact, allows the benefit to society to be sustainable.
Influencing government decisions	Individual participations to influence change in policies.	Can help refine government policies and point to areas which require more attention.
Strengthening citizens' sense of belonging	Help Singaporeans to develop care for society.	

Chapter 4.1 – Identity and Diversity

Identity

- Nationality
- Race and Ethnicity
- Religion
- Socio-Economic Status

4.1.1 – Nationality

POINT Refers to the status of belonging to a particular nation.

EXAMPLE Singaporean, Brazilian, Chilean.

EXPLAIN People from the same country feel more comfortable with other members of the same country.

4.1.2 – Race and Ethnicity

POINT Race refers to the classification of people according to physical characteristics that are biological in nature such as skin colour. Ethnicity refers to one's ancestry, cultural practices, language, customs, food and dressings that are associated with an ethnic group.

EXAMPLE Different races in Singapore celebrate Chinese New Year.

EXPLAIN People of different races and ethnicities add to the diversity by bringing food options, languages and leisure activities.

4.1.3 – Religion

- POINT** An organised collection of attitudes, beliefs and practices. Worship of Gods determined by choice or birth.
- EXAMPLE** Christianity, Islam, Sikhism, Judaism, Buddhism
- EXPLAIN** Believers share and keep the same set of core beliefs and practices regardless of nationality and ethnicity. Interreligious organisations help to promote peace and religious harmony in Singapore.

4.1.4 – Social-Economic Status

- POINT** An economic situation shared by a group of people determined by jobs, income, education and wealth (this is a prevalent situation in Singapore in 2019).
- EXAMPLE** **Low SES** – do not possess much wealth, do not have enough money to support themselves, work as blue collars, take up manual labour jobs that do not require many skills; **Middle SES** – PMETs working in offices, white collar workers; **High SES** – investors, company owners, access to better housing and lifestyles.
- EXPLAIN** It shapes one's life and identity by differentiating the social circle and types of activity one does with their economic capability. Can result in income inequality when the income gap widens over time.

Chapter 5.1 – Reasons for Greater Diversity in Singapore

Reasons for Greater Diversity

- Immigration Policy
- Economic Opportunities
- Socio-Cultural Environment

5.1.1 – Immigration Policy

- POINT** Singapore has a lax/lenient immigration policy, meaning that it is not strict.
- EXAMPLE** After gaining independence in 1965, there was a major lack of workers for labour-intensive works for Singapore's industrialisation programme. In the 1980s, Singapore's population was declining with professionals leaving Singapore to work in other first world countries, resulting in a brain drain. Today, the policies focus more on higher-skilled foreign workers who can contribute ideas, skills and experiences to help to improve Singapore's economy.
- EXPLAIN** Singapore's population will decline without immigrants. Fewer consumers result in companies having no demand and inability to set up in Singapore.

5.1.2 – Economic Opportunities

POINT Economic opportunities in Singapore often is the main reason attracting immigrants as back in their home country economic opportunities may not be as good.

EXAMPLE Multinational Corporations (MNCs) such as McDonald's, KFC and Burger King.

EXPLAIN Global investors are attracted to Singapore with the ease of doing business, growth potential, stable political environment and well-established Judiciary system implying low corruption.

5.1.3 – Socio-Cultural Environment

This is split into 3 sub-factors which include the following:

- Community Support
- Safe Environment
- Quality Education System

Community Support

POINT Singapore is home to a range of ethnic communities and cultures from all over the world. These communities or immigration support groups help foreigners feel more at home in Singapore.

EXAMPLE In talking about the Korean community, there are large collections of Korean restaurants and shops in Novena.

EXPLAIN Openness in Singapore implies that migrants would receive social and emotional support, inculcating a sense of belonging in them. They would have a sense of familiarity living in the country.

Safe Environment

POINT Migrants consider safety and security when deciding on a country to work in. The foreigners and their supporting communities will thrive in a safe environment.

EXAMPLE There is a very low crime rate in Singapore and it has been declining since 2005 annually.

EXPLAIN Migrants would feel safe in a secure environment and they would have their safety guaranteed living in the country.

Quality Education System

POINT A high-quality education which offers high standards of certification and a wide range of courses attracts migrants or their children to come to the country.

EXAMPLE Singapore is a well-known hub for quality education. Universities are ranked highly in the world and polytechnics offer a vast range of courses.

EXPLAIN Migrants would feel secured with a good education system in Singapore.

Chapter 6.1 – Effects of living in a Diverse Society

Effects of living in a Diverse Society

- People Interactions
- Exchange of Skills and Knowledge

Chapter 6 focuses on the impacts of living in a diverse society. We can classify these impacts into positive and negative ones.

6.1.1 – People Interactions

POINT As societies become increasingly diverse, disagreements will happen, and interactions need to be meaningful to strengthen harmony, increasing willingness to live together.

EXAMPLE Harmony can be achieved with creating of common space which is a platform for shared values, and common experience to build a national identity. The People's Association (PA) serves as a bridge between the government and the people promoting racial harmony and social cohesion through activities (i.e. learning journey, house visits).

EXPLAIN This provides opportunities for people of different backgrounds to come together, interact and share common experiences.

6.1.2 – Exchange of Skills and Knowledge

POINT There can be collaboration and exchange in knowledge and skills in areas of research and development with overseas experts.

EXAMPLE An example includes the Biomedical Research Council (BMRC) under the Agency for Science, Technology and Research (A*STAR). Internationally renowned scientists and companies with expertise and knowledge help to jumpstart Singapore biomedical fields.

EXPLAIN Deeper understanding and appreciation can be developed from being open when we share with and learn from others. When people are open to learning and sharing with others, we would benefit from the enriching experiences that result from such interactions.

Chapter 6.2 – Challenges of living in a Diverse Society

Challenges of living in a Diverse Society

- Prejudice and Misconceptions
- Competition of Resources
- Concerns over Social Mobility

6.2.1 – Prejudice and Misconceptions

POINT Negative sentiments can arise when people jump to conclusions about others and make incorrect judgements due to insufficient understanding.

EXAMPLE In 2012, a University student from China who was studying in Singapore referred to Singaporeans as dogs, leading to increased tensions and prejudices of various nationalities.

EXPLAIN Negative stereotypes happen when people have wrong generalised thoughts of others. This is also known as prejudice. Prejudice will contribute to discriminations against the victims.

6.2.2 – Competition of Resources

POINT Singaporeans may be concerned over the competition in public transport, healthcare resources and availability of public housing.

EXAMPLE The government has come up with actions to mitigate the situation by expanding the railway network, increasing public housing and number of hospital beds.

POINT Singaporeans may feel that foreigners are taking their jobs away. They think that employers rather employ foreigner workers than locals for a lesser pay demand.

EXAMPLE The government has tightened the immigration framework, curbing the flow of manpower into Singapore. Such an example is an increase in work permit levy.

EXPLAIN Foreigners are tapping on Singapore's funds. Singaporeans blame the foreigners for taking away their jobs and feel that this influx leads to congestion. This leads to tensions between Singaporeans and the foreigners.

6.2.3 – Concerns over Social Mobility

POINT The movement of individuals between different socio-economic statuses.

EXAMPLE Singapore emphasises on retraining and learning of new skills to stay relevant to economic demand. It also upholds the principle of meritocracy contributes to the success of Singapore when people understand that they are awarded based on their efforts and not other biased reasons.

EXPLAIN Those in the lower income group are affected when manufacturing companies shift abroad for cheaper labour.

Chapter 7.1 – How can we respond in a Diverse Society

Responding in a Diverse Society

- Assimilation
- Integration

Chapter 7.1.1 – Assimilation

POINT Immigrants are expected to adopt the beliefs and practices of the majority group in the host country.

EXAMPLE In France, the French believe in secularism and religion is separated from governance so as to emphasize national identity. **Education** – discussion of religion is disallowed except for Philosophy and History lessons in school; adaption classes are conducted for children immigrants to improve their French so that they can eventually join French school; **Economy** – government introduced diversity charter to support minority groups in employment, achieving a discrimination-free work environment; **Naturalisation process** – immigrants have to undergo French language courses and culture test.

BENEFIT Allows immigrants to become part of the majority group.

CHALLENGE Difference between locals and immigrants are less respected. Immigrants would want to continue to live with their own religion openly but the country practising assimilation would restrict them and this causes conflicts.

Chapter 7.1.2 – Integration

POINT Immigrants are allowed to retain their unique identities while forging common ground with the groups living in the host country.

EXAMPLE In Singapore, integration is practised. **Policies** – bilingual policy is introduced in schools. English and one Mother Tongue language are compulsory. Ensures that different ethnic groups can communicate; **President Council of Minority Rights (PCMR)** to ensure that minority groups have government representation; **Ethnic Integration Policy (EIP)** ensures that there is a balanced ethnic mixture in HDB estates. Prevents ethnic enclaves and encourages interaction and racial harmony; **Naturalisation process** – new immigrants have to go through citizenship journey before getting their IC and passport; **Common experiences** – opportunities are made to encourage and help immigrants to get closer with the Singaporean society such as national service, creating a stronger sense of national identity between both immigrants and locals; **Community support** – activities are organised by PAP such as festive celebrations at community centres.

BENEFIT Difference between people are respected and immigrants have a sense of national identity while maintaining their unique identities.

CHALLENGE Immigrants are blamed for competing jobs with locals, worsening traffic conditions etc. down of public transports.

Chapter 7.2 – Management and Impact of Socio-Economic Diversity

Management and Impact of Socio-Economic Diversity

- Market-based approach
- Shared responsibility approach
- Government-financed approach

7.2.1 – Market-Based Approach

POINT The government gives citizens freedom to decide on their standard of healthcare within their budget. Allows the market to decide on the provision of services to meet the healthcare needs.

EXAMPLE In the United States of America (USA), policies such as Medicaid and Medicare are provided to assist lower SES people and Obamacare for most Americans, allowing healthcare to be more affordable.

BENEFIT Lower SES people will not have to suffer from the burden of unaffordable healthcare as they can select the healthcare services which they can afford. Higher SES people can choose their higher standards of healthcare services without using the government's funds. Healthcare coverage improves.

CHALLENGE Insurance companies will suffer from huge losses and insurance prices will rise. There will be a decrease in the quality in service of the lower-class wards as hospital will focus on richer patients who can bring them more profit.

7.2.2 – Shared Responsibility Approach

POINT The government provides basic healthcare services and it is partially subsidised by the government. The remaining costs are paid individually, balancing personal responsibility and the government's role.

EXAMPLE In Singapore, policies such as Medisave are created and people can choose their preferred healthcare service at their own expenses from their CPF accounts with government subsidising part of the cost. This can allow Singaporeans to have less burdens when it comes to medical expenses.

BENEFIT Healthcare remains affordable for the lower income groups due to the government's assistance. Citizens are encouraged to take responsibility for their own health, reducing the government's burden and frees up resources for them to spend on improving the quality of the healthcare system.

CHALLENGE It is not easy to keep up with the growing demand for healthcare as more funding and resources are needed especially for the ageing population. There will be a rise in healthcare cost globally and it requires more government funding and cost-effective treatments by hospitals.

7.2.3 – Government-Financed Approach

- POINT** Government believes that everyone across socio-economic status should have access to healthcare services. The government provides substantial healthcare services to most of its citizens and some healthcare are fully covered by the government.
- EXAMPLE** In Sweden, all adults only need to pay 122 euros in a year for all their healthcare visits included in their tax regardless of the type of visits.
- BENEFIT** Able to meet the healthcare needs of the people since healthcare services are accessible and affordable to people from the different SES groups.
- CHALLENGE** The huge demand of resources leads to a lack of choices for treatment. Insurance companies will be forced to provide coverage for the poor, creating loss for them.

Chapter 8 – Living in a Globalised World

Driving Forces of Globalisation

- Developments in Transportation
- Growth of MNCs
- Advancements in Technology

8.1 – Developments in Transportation

- POINT** The development of efficient and integrated transportation infrastructure.
- EXAMPLE** The addition of the SG-KL high speed rail leads to globalisation. With such rail way networks being established, there will be a more effective and higher connectivity between Singapore and Malaysia, contributing to interconnection between countries. *(You may also talk about planes and container ships.)*
- EXPLAIN** More goods and services can be carried each trip, leading to savings in transport. This encourages individuals to travel and exchange more often.

8.2 – Growth of MNCs

- POINT** MNCs refer to multinational corporations. These are businesses with economic activities in more than one country.
- EXAMPLE** Local MNCs (i.e. Singapore Airlines) go abroad. This created interconnections and interdependent relationships between economic activities in Singapore and around the world. Foreign-owned MNCs that set up operations in Singapore (i.e. Toyota) provide employment and offer higher wages. It brings in new technology and expertise.
- EXPLAIN** MNCs increase the economic interconnections between people and goods, leading to interdependent relationships between parties involved in running the MNCs. This creates jobs for locals, raising their standard of living and quality of life.

8.3 – Advancements in Technology

- POINT** Advancements in technology resulted in greater access to the Internet and increasing use of mobile communications.
- EXAMPLE** People can gain access to a vast amount of information such as via Google. (Other examples include having smartphones, applications and the Internet.)
- EXPLAIN** Allows easy exchange of information and ideas. Efficient sharing of information reduces the time and resources spent on searching of information. Increasing flexibility and agility allows organisations to better recognise and respond to new opportunities, requirement and services. This facilitates the MNCs' growth and their ability to offer better services worldwide.

Chapter 9 – Tensions arising from the Economic Impacts of Globalisation

Tensions arising from the Economic Impacts of Globalisation

- Impacts on Countries (economic growth, economic downturn)
- Impacts on Companies (higher profits/market share, lower profits/market share)
- Impacts on Individuals (higher income, lower income)

	Positive	Negative
Impacts on countries	• Increased revenue, gross domestic product (GDP) due to tourism, trade, investments etc.	• Decreased revenue, gross domestic product (GDP).
Impacts on companies	• Increased profits due to cheaper labour and resources and having an expanded market.	• Increased competition. • An increased need to constantly innovate.
Impacts on individuals	• Increased income/wages (i.e. more job choices overseas, better benefits).	• Lower income due to competition and sudden closure of the company. • Need to upgrade/retrain.

9.1.1 – Impacts on Countries (Economic Growth)

- POINT** Leads to increased trading and expansion of businesses in different parts of the world.
- EXAMPLE** Singapore and the USA signed a Free Trade Agreement (FTA) in 2004 which included electronics and information technology, petrochemicals, chemicals and textile industries.
- EXPLAIN** Results in a greater variety of goods and services for consumption, increased tax revenue and employment opportunities, strengthening the country's economy as it increases growth potential, leading to diversification of economic activities.
- CHALLENGE** Challenges posed by FTA include foreign products can be cheaper than local products, resulting in increased competition among foreign and local products, affecting the livelihoods of local businesses.

9.1.2 – Impacts on Countries (Economic Downturn)

- POINT** The rise and fall of economies are closely tied to trade and investments between countries.
- EXAMPLE** The government responded to the 2008 Global Financial Crisis. Workers who lost jobs were given help finding new ones and retraining opportunities. New businesses and smaller companies were granted tax exemptions.
- EXPLAIN** When the economy of one country faces a downturn, other countries are affected, resulting in less income and employment for the affected countries.

9.2.1 – Impacts on Companies (Higher Profits/Market Share)

- POINT** Allows companies to widen their market reach by expanding their production and sales of goods in many parts of the world.
- EXAMPLE** Technology has assisted Hyflux to meet the requirements of the global water industry and effectively compete through their innovative solutions.
- EXPLAIN** MNCs earn higher profits by being able to set up operations in various locations, source for cheaper labour costs and cheaper production costs.

9.2.2 – Impacts on Companies (Lower Profits/Market Share)

- POINT** Increases competition from others in the global scenes.
- EXAMPLE** French hypermarket chain, Carrefour, closed its only branch in Singapore after 15 years due to competition from other companies offering similar products in Singapore.
- EXPLAIN** To succeed, the company needs to innovate constantly, reinvent itself to remain unique and valuable, constantly introduce new features into products and services and anticipate how markets may change and act to remain relevant. The government provides financial assistance as well.

9.3.1 – Impacts on Individuals (Higher Income)

- POINT** Results in greater mobility for the individual. Individuals move across the globe for better job prospects and higher income.
- EXAMPLE** An NTU engineer headhunted for a job in Dubai for thrice of Singapore's pay and a less-demanding lifestyle.
- EXPLAIN** Individuals may benefit from globalisation as overseas companies may want to employ them due to their skills.

9.3.2 – Impacts on Individuals (Lower Income)

- POINT** Results in increased competition for jobs all over the world. It is also an evolving economy with newly-created jobs.
- EXAMPLE** Uniqlo used to base operation in Shenzhen, China. When labour costs started increasing there, it shut down its production and moved to Vietnam as there were cheaper production costs.
- EXPLAIN** Global companies will easily shift their operations to a country with lower labour costs and it can mean a huge loss of jobs in the country the company is leaving. Individuals may lose their job if they are unequipped with new skills.
- SOLUTION** Singapore implemented SkillsFuture which is a national movement aimed to provide Singaporeans to develop their fullest potential and a personal mastery of skills throughout life.

Chapter 10 – Tensions arising from the Cultural Impacts of Globalisation

Tensions arising from the Cultural Impacts of Globalisation

- Cultural Homogenisation and Hybridisation in Entertainment
- Cultural Homogenisation and Hybridisation in Food

	Positive	Negative
Cultural homogenisation		• Loss of local culture. • Disharmony.
Cultural hybridisation	• A wider variety of products.	• Loss of local culture (not as significant as homogenisation).

10.1.1 – Cultural Homogenisation in Entertainment

- POINT** Local cultures are changed by foreign cultures. Dominance of foreign cultures.
- EXAMPLE** Dominating influence of American culture and rise of Korean influences (K-wave). The American film 'Kung Fu Panda' was released in China and was met with protest from the Chinese because the movie was accused of creating an inaccurate portrayal of Chinese culture. Protesters perceived the movie to have misrepresented the cultural icon of China – the panda, and one of China's martial arts – kung fu. (*Mainly Americanisation.*)
- EXPLAIN** Local cultures become more and more similar to foreign culture. Leads to local cultural dilution and loss.

10.1.2 – Cultural Hybridisation in Entertainment

- POINT** Foreign and local cultures are blended, resulting in unique combinations containing elements from both cultures. This can lead to changes to the nature of local cultures.
- EXAMPLE** It is evident in music and manga art and comics.
- EXPLAIN** Cultural hybridisation in entertainment results in a wider variety of programmes.

10.2.1 – Cultural Homogenisation in Food

- POINT** Local cultures become similar to foreign culture.
- EXAMPLE** The presence and proliferation of fast food outlets like MacDonald's, KFC and Subway, reflect the general acceptance of foreign cultural influences. Given the case of the Italians who resisted cultural homogenisation in food, they protested against MacDonald's plans to build its first fast food restaurant in the country in 1986. Protesters held bowls of pasta in their hands to show their disapproval of American culinary culture.
- EXPLAIN** Leads to local cultural dilution and loss (negative impact). However, it can result in harmony among people due to them having a common ground.

10.2.2 – Cultural Hybridisation in Food

- POINT** Foreign and local cultures are blended, resulting in unique combinations containing elements from both cultures. This can lead to changes to the nature of local cultures.
- EXAMPLE** Local cultures can maintain their influences when hybridisation takes place. Foreign fast food items and menus are modified to local tastes. During the Hari Raya season, MacDonalds introduces the Rendang Beef Burger to cater to the likes of locals in Singapore. The influence of local cultures can be maintained.
- EXPLAIN** Cultural hybridisation food would lead to a greater variety of food choices but it can result in dilution, but not as extreme as cultural homogenisation. Ideally, the local culture would experience a loss in authenticity.

Chapter 11 – Tensions arising from the Security Impacts of Globalisation

Tensions arising from the Security Impacts of Globalisation

- Managing Cyber Security Challenges (governments, individuals)
- Managing Transnational Terrorism (preventive, protective and responsive measures)

11.1.1 – Managing of Cyber Security Challenges (Government)

- POINT** Government placing emphasis on strengthening security defence to manage cyber security. They can educate individuals on cyber wellness and cooperate with other agencies to protect security.
- EXAMPLE** The Cyber Security Agency (CSA) ensures the safety of Singapore's critical infrastructure including energy and banking sections. The Asia Pacific Computer Emergency Response Team (APCERT) is a collaboration with other countries in order to maintain a network of computer security expert in the region. Interpol opened its first digital crime centre in 2015. It provides member countries with the tools and techniques to counter the latest cybercrime trends.
- EXPLAIN** The government can invest the manpower and resources into ensuring the safety and security of the country's technological hardware and software.

11.1.2 – Managing of Cyber Security Challenges (Individuals)

- POINT** Individuals are to remain vigilant in ensuring own cyber security.
- EXAMPLE** They ensure that computer is defended against technological threats through installing anti-virus programmes. Use strong passwords and change them regularly. Be smart about what and how one accesses online materials. Never be complacent about online privacy.
- EXPLAIN** Individuals can reduce their vulnerability towards cyber attacks.

11.2.1 – Preventive Measures in managing Transnational Terrorism

- POINT** Measures that will cause terrorists to have difficulties leaving or entering a country which will cause them to have difficulty carrying out their attacks.
- EXAMPLE** Effective border control. The Immigration and Checkpoints Authority (ICA) uses biometric technology in immigration process, effectively tracking people moving in and out of Singapore.
- EXPLAIN** Terrorists are unable to enter or exit the country to carry out their plans. This helps to reduce the compatibilities of terrorist groups and keep the country safe from terrorism.

11.2.2 – Protective Measures in managing Transnational Terrorism

- POINT** Measures that protect citizens from existing terrorists when long term measures are not effective enough.
- EXAMPLE** Police officers are also deployed and stationed at different MRT stations around Singapore to be on a lookout for potential threats. Bag checks are conducted and vigilance is enhanced in such areas.
- EXPLAIN** Security is enhanced for key places in the event that terrorists get past the country's borders. Such efforts ensure that the country remains vigilant in the face of potential transnational terrorist attacks.

11.2.3 – Responsive Measures in managing Transnational Terrorism

- POINT** Measures that ensures a country is prepared to deal with damage caused by a terrorist attack.
- EXAMPLE** Joint exercises between different agencies (i.e. Exercise Heartbeat). Collaboration with other countries such as having multinational counter-terrorism drills. The International Security Assistance Force (ISAF), a NATO-led security mission, deployed troops to Afghanistan to fight Al Qaeda.
- EXPLAIN** This increases the citizens' level of preparedness in case of an actual attack and where there are actual attacks, there will be less destruction and loss of lives.
